DETAILED ACTION

Specification

1. The specification is objected to because of the following informality:

The Applicant should remove her name, address and phone number from the title of the invention on page 1 since they are not normally part of a title and since the applicant may not want these elements, particularly the address and phone number, published.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. The claim is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim is narrative in form and replete with indefinite and functional or operational language. The structure that goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited. For examples, see claim 1 for each of the following: U.S. 2004/0025364 to Elder et al., U.S. 4,924,597 to Tursi and U.S. 2,681,633 to Basso.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. The claim is rejected under 35 U.S.C. 102(e) as being anticipated by JP 2003130602 A to Furuta.

Furuta discloses a regular tape measure having a suction cup (7) added to the bottom that allows the unit to swivel, said suction cup having cross hairs (6 as shown in figures 2 and 3).

6. The claim is rejected under 35 U.S.C. 102(e) as being anticipated by U.S. 20040025364 to Elder et al.

Elder et al. discloses a regular tape measure having a suction cup (element 90 of paragraph 0039) added to the bottom that allows the unit to swivel, said suction cup having cross hairs (the angular indicia) thereon.
